

HORSEFEED OF THE HIGHEST QUALITY

# HAVENS

[WWW.HORSEFEED.NL](http://WWW.HORSEFEED.NL)

LEADING BRAND

HAVENS Horsefeed from the Netherlands is a leading brand in equine nutrition and horsefeed in Europe. The company was founded in 1845 and ever since HAVENS has been continuously developing and improving its feed products.

Today, we proudly present a complete and versatile range of cubes, mixes and mueslis for all types of horses in recreation, competition, training and breeding. The HAVENS product range is sold through regional resellers in over 50 countries world-wide.

We make use of only high-quality ingredients and all feeds are guaranteed 100% natural (100% vegetable) and do not contain any ingredients of animal origin.

HAVENS Horsefeed is HACCP and GMP-Plus certified to meet qualita-

tive demands. All incoming ingredients, the complete production process and the delivery of products is subject to strict rules to ensure feed of a qualitative high standard.

- Sustainable high quality
- HACCP-certified production
- Recommended by international professionals
- Guaranteed 100% natural ingredients
- Over 50 different ingredients

Your horse's nutrition is our care...!

Our modern factory, located in the south-east of the Netherlands near the city Venlo.

# FEED FOR MARES AND FOALS

With extra added amino-acids

## FERTO-LAC 3

SPECIAL BROODMARE CUBES

HAVENS Ferto-LAC 3 Broodmare Cubes offers the following advantages:

- Increased energy and protein level for an optimal milk production;
- Increased level of the 3 most important amino-acids (Lysine, Methionin, Cystein);
- Increased level of the 3 bone minerals Ca., P. and Mg.;
- Multi-Calcium-Complex: 3-fold Calcium-provision with perfect releasing to prevent orthopaedic diseases like OCD;
- High levels of Vitamins to support the mare's fertility and the foals resistance and immune system.
- To be fed from 6<sup>th</sup> month of gestation until weaning

## OPTI-GROW

BASIS FOR LATER PERFORMANCE

HAVENS Opti-GROW Foal Cubes have high levels of the best quality proteins, extra energy and many milk products to supply foals with a good start.

- Increased energy- and protein level for optimal muscle building
- High in vitamins, trace-minerals and essential amino acids
- Multi-Calcium-Complex and threefold Calcium-provision for a strong and healthy skeleton (reduces the risk for OCD)
- Very tasty and digestible, in order to permit feed intake by the foal from a few weeks of age onwards
- To be fed from a few weeks of age until 18 months of age

## NO SALE WITHOUT X-RAYS

The breeding of foals is an expensive business. Mare, stud fee, feed and care - together the costs can amount to large amounts of money. That is exactly why you should not take any risk with the feed for the unborn foal, as during gestation your mare is laying the basis for OCD-free X-rays of the foal!

## FEEDING "THROUGH THE UMBILICAL CORD"

Specific nutrients such as copper cannot be supplied to the foal through the milk but can only be provided through the umbilical cord. These nutrients are especially of great importance to the foal. That is why the prevention of orthopaedic diseases (e.g. OCD or navicular disease) starts with choosing the right feed for the gestating mare.

The HAVENS Ferto-LAC 3 with MCC (Multi-Calcium-Complex) was especially developed to meet the specific nutritional needs of the mare. It is a special cube for gestating and lactating mares with an additional calcium- and copper-Complex and extra vitamins (Vit.A, E, Folic Acid etc.) for an optimal intake by the (unborn) foal.

**“THE GREEN VET”**  
 REFORM-HERBAL-MUESLI

A complete and exclusive mixture of micronised cereals (barley, wheat, maize), rolled black oats, alfalfa, carrot flakes, alfalfa and a wide variety of natural herbs and essential oils.

It contains special herbs, a.o. eucalyptus, thyme, peppermint, pennyroyal, marjoram and basil.

- Extremely low protein level
- Highly digestible and very tasty
- High in vitamins (esp. Vit. B., E., Biotine)
- Stimulates digestion, general health and muscle metabolism

REFORM-HERBAL-MUESLI IS VERY SUITABLE FOR:

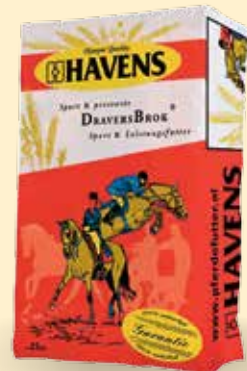

- Horses with digestive problems
- Allergic horses or horses sensitive to too much protein
- Muscle stimulation
- Respiratory system stimulation

**BASIS-SPORT**  
 CONDITION CUBES

A non-heating, fully balanced condition cube for light to medium work.

- Complete alfalfa based formula
- Contains all essential vitamins and minerals
- Suits all horses, especially cold bloods, and mature horses and ponies
- Oat free; maintains calmness

**DRAVERSBRÖK®**  
 NO. 1 BESTSELLER

No. 1 bestselling sport- and performance cubes for all horses in medium to heavy training.

- 100% natural energy from cereals, alfalfa, linseeds, etc.
- For perfect vitality and optimal hoof and skin condition
- High levels of B-vitamins, Biotin, and beta-carotene

**COOL-MIX**  
 MUESLI WITHOUT OATS

Complete non-heating mix with extra alfalfa and unique spelt wheat for all easy-to-feed horses or nervous or sensitive horses.

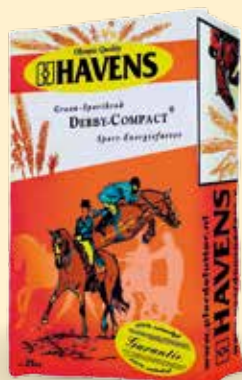

- Low energy; slow-releasing for better control
- With easy digestible fibres and a high level of natural beta-carotene
- High levels of minerals, vitamins and trace elements
- Low sugar to reduce risk of laminitis

**SPORT-MUESLI**  
 ALLROUND

An all-round horse muesli for all kind of sport- and breeding horses with corn and barley flakes, black oats and a special vitamin supplement.

- Highly digestible, low in protein and high in energy
- Ensures perfect condition and vitality
- Gives extra energy after training

### DERBY-COMPACTBROK PERFORMANCE

Premium high energy sportcubes for top performance and hard/intense training. Highly digestible due to its exclusive and cereal based composition.

- Low level of protein (but highly digestible)
- High in vitamins (e.g. Vit.B-complex and Vit.E.)
- Contains a specific natural yeast for optimal digestion of cereals

### SLOBBER-MASH +EXTRA LINOL

Original oat free mash with toasted linseed meal for a purifying action.

- Rich in vitamins and easy digestible fibres
- With extra linoleic acid and sunflower oil
- Ideal for horses with digestion problems, equine colic or (old) horses with chewing problems
- Improves hoof and coat condition

### NATURAL BALANCE A HEALTHY MUESLI WITH UNIQUE CHARACTERISTICS

- **Free of molasses and no added sugar.** Highly suitable for sober breeds and horses that are prone to laminitis, summer itch and insulin resistance.
- **Optimal omega 3/6 ratio** for an improved fertility, stamina, hoof quality, skin, fur, and ability to concentrate and performance.
- **High fiber level** for a high saliva production. Therefore suitable for horses sensitive to stomach ulcer developments and/or stress.
- **Spelt wheat** with natural glucosamine for flexible and vital joints. Suitable for horses with arthritis.
- Contains **garlic**; very suitable for horses that are troubled by insects, horseflies and flies.
- Completely **oat free** and therefore very suitable for horses that are allergic to oats and nervous horses and ponies.

### POWER-PLUS MIX MUSCLE FITNESS

Concentrated premium cereal mix with black oats and micronised maize and barley for horses in training and sport. Ensures extra power and strong and elastic muscles without fattening.

- Low protein level; to avoid overcharging the kidneys
- High vitamin-levels (e.g. Vit. A., B., E., Biotine)
- Contains extra electrolytes (ideal for intense training or in hot climates)

### KENTUCKY LITE E GLYCOGEN-LOADING

Kentucky Lite E is an energy mix, with black oats, special high-performance-vitamin cubes and soybean oil, for horses in hard work.

- Permits optimal loading and storage of the glycogen reserves
- High energy level from carbohydrates and starch
- High Vit.E; improves muscle condition

## HELP-DESK

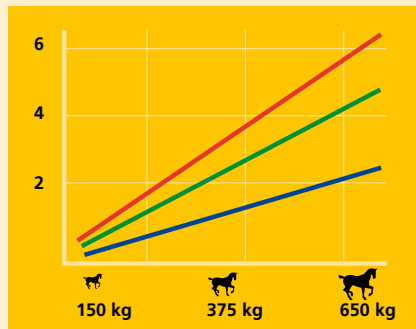

Please contact us for feeding advice or contact details of resellers in your country:

Tel.: +31 478 638 238

E-Mail: info@havens.nl - www.horsefeed.nl

### FEEDING QUANTITY

kg cubes or muesli per horse per day

Please note that the amount a horse should be fed is influenced by multiple factors like weight, breed, age, amount of exercise etc. etc.

The table on the left displays general advice about how much to feed your horse. Exercise level is divided into low, medium and high and body weight into 300 kg, 450 kg and 600 kg.

- High exercise
- Medium exercise
- Low exercise

## GENERAL FEEDING ADVICE

- 1 Feed your horse with small portions regularly. Horses are generally used to eating 60-80% of their time and used to set feeding times.
- 2 Do not change the feed or feeding time at once but make small changes instead.
- 3 Feed as much as the horse NEEDS, if it gets too skinny feed it more, if it gets too fat you are feeding too much.
- 4 Always feed your horse with enough good quality roughage.
- 5 Supply your horse with hay first before you give it muesli or cubes. This stimulates the production of saliva and ensures a better digestion.
- 6 Let the horse rest for at least 1 hour after feeding before you ride it.
- 7 Always provide your horse with fresh water.

## ACCESSORIES

HAVENS has a diverse range of accessories available, such as saddle pads, clothing and feed bins, buckets and scoops. Please contact your local HAVENS-reseller for availability and prices. See also [www.horsefeed.nl](http://www.horsefeed.nl)
